Give Your Customers the MobileAccess Universal Network –

MobileAccess Universal - More Than A Product Line

MobileAccess Next Generation - 4G and Beyond

The \$552 billion dollar indoor wireless infrastructure market is growing as more large enterprise customers evaluate their in-building coverage options for WLAN, 3G and 4G and beyond. Right now your customers are seeking in-building coverage solutions to support their wireless needs, such as cellular services from multiple operators, public safety, paging, or wireless patient telemetry. Take advantage of the market momentum and give your customers what they want: The MobileAccess Universal Wireless Network.

The MobileAccess Universal Network offers the industry's most flexible portfolio of solutions – it's more than a product line. A variety of single-carrier, multi-carrier and innovative solutions architectures offer comprehensive and cost-effective infrastructure choices for enterprises of all sizes.

With the industry's best solution portfolio, you can create a perfect fit solution and distinguish your offerings from competitors' while expanding your revenue opportunities:

- ❑ **Differentiate From the Competition:** With a MobileAccess solution, you can provide your customers with a wireless infrastructure that makes a strategic impact and goes well beyond that of a conventional one-size fits all solution.
- ❑ **Address New, High-Growth Markets:** With LTE and WiMAX on the horizon, carriers are ready to invest in wireless infrastructure solutions that make 4G a reality indoors. Tap this 4G opportunity with the most advanced infrastructure options on the market.
- ❑ **Sell a Perfect Fit Solution:** Our flexible cabling options eliminate the need to force fit new cabling and re-wire facilities from top to bottom. With greater flexibility, you can enable all wireless services in operation today, at the best price. The MobileAccess Universal Network offers the best features in the industry:
 - **Smart Antenna Technology** enables LTE and WiMAX services which demand efficient antenna infrastructure that goes beyond throughput maximization.
 - **Distributed Architecture** eliminates single points of failure that affect large coverage areas.
 - **Compatibility with Multiple Capacity Sources** - The new MobileAccessVE solution supports a variety of centralized and distributed capacity sources, high and low power options.
 - **Multiple Cabling Media Options** ensure best price and design flexibility.
 - **Modular Design** - Easy-to-replace discrete elements simplify upgrades, enabling a "Pay as You Grow" strategy.
 - **High Network Reliability** - End-to-end system element monitoring enables instant fault identification from signal source to antennae.

With the MobileAccess Universal Network in your wireless portfolio, you can satisfy all of your customers' wireless connectivity requirements. At the same time, the MobileAccess portfolio gives you multiple opportunities to drive revenue growth and increase the value of every account.

MobileAccess VAR Partner Program Overview

MobileAccess is a 100% indirect, channel-driven company. We are only successful if our value added partners are successful. The mission of the MobileAccess Partner Program is to make it simple for our partners to take the best solutions to market. We'll develop, market, and support our cutting-edge portfolio while helping you grow your business.

The VAR Partner Program offers two levels of participation based on a partner’s capabilities:

Tiers of VARs	Annual Revenue Requirement	Training & Support	Purchase Products	Sales	RF Planning, Installation and Post-Installation
Premier	\$500,000+	MA		VAR	
Distributor		MA		VAR	VAR or Auth. Service Center
	< \$500,000	Or Distributor	Auth. Distributor		

Premier: Premier VAR partners capable of selling MobileAccess products across their regional or national customer base. Premier VARs have the resources to sell, design, and implement MobileAccess solutions. Partners must pass a certification process and hold a track record for sales success with our solutions. Every VAR has the opportunity to become a Premier VAR and enjoy additional discounts and other exclusive benefits.

Distributor: Distributor VAR partners are regionally designated resellers, purchasing equipment from our Distributors. Distributor VARs have the option of receiving service assistance from our MobileAccess Authorized Service Centers.

When you join the MobileAccess Partner Program as a new VAR, you receive full support from our certified distributors and dedicated support teams. When you achieve Premier Partner status, you continue to focus on selling while MobileAccess gives you the tools and dedicated channel management support along with round-the-clock technical and design support, comprehensive in-person and online training, competitive tools and the latest market education.

Partner Program Requirements

MobileAccess has identified a set of requirements for each level of VAR within the Partner Program – these are designed to help our partners identify new business opportunities and allow top-performing VARs to receive dedicated MobileAccess support.
